Notes

- **Rybbit** analytics is limited to the marketing site and selected app areas. Tracking is fully disabled on sensitive areas (session processing, analysis results, account and billing management, authentication, and administration). Active session views, setup/planning flows, and invitation flows are measured with URL-path anonymisation (visits counted; identifiers and tokens not transmitted in clear path form).

- **OpenAI** and **Anthropic** process prompt data for voice session analysis. Data minimisation is applied; zero-data-retention (ZDR) options are evaluated where available at the applicable plan tier.
- **Stripe** acts as payment processor and is subject to PCI DSS Level 1 compliance independent of this agreement. For fraud prevention and card verification, Stripe may collect the cardholder's billing name, billing address (including ZIP/postal code), and IP address at checkout. Stripe also sets device-identification cookies (`__stripe_mid`, `__stripe_sid`) via its JavaScript library. Stripe acts as an independent controller for fraud and risk data under its own privacy policy (stripe.com/privacy).
